CHAPTER ONE

1. …….. is an umbrella term used to describe a Collection of technologies that are used to plan, Design, develop and deploy state-of –the-art Websites and web applications.
2. …….is a system(ISO standard) used to specify Document structure.
   a) SGML
   b) HTML
   c) XML
   d) XHTML
3. SGML stands for ……..
4. List any two languages derived from SGML
5. Which language makes it possible to Present information on the Internet.
6. Web pages all over the world consist of……
7. HTML is not a programming language. True/False
8. HTML is a markup Language. True/False
9. Which of these is a universal format for structured documents and data on the World Wide Web.
   a) HTML
   b) XML

c) CSS
d) PHP

10. ..…..……has no fixed, predefined set of tags and individual markup formats can be defined.
    a) HTML
    b) XML
    c) CSS
    d) PHP
11. Which of these is a style sheets language (style language) Introduced by W3C.
    a) HTML
    b) XML
    c) CSS
    d) PHP
12. …….. refers to the process of determining the priority of styling rules
13. AJAX stands for …….
14. AJAX, JavaScript, XML, XSLT and CSS are not programming languages. True/False

15. ……. Website Applications can send data to and retrieve data from servers asynchronously
    a) HTML
    b) XML
    c) CSS
    d) AJAX
16. ……is a cross-platform, general-purpose language originally designed for generating dynamic web pages.
    a) HTML
    b) XML
    c) PHP

d) AJAX

17. Which of the following are competitors.
    a) HTML and XML
    b) PHP and HTML
    c) PHP and ASP.net
    d) AJAX and PHP
18. Which of these is server side scripting languages.
    a) HTML
    b) ASP.net
    c) XML
    d) None of the above
19. Which of these is client side scripting languages.
    a) HTML
    b) ASP.net
    c) PHP
    d) JavaScript
20. …… mirrors or extends versions of the widely used Hypertext Markup Language (HTML).
    a) XHTML
    b) XML
    c) PHP
    d) AJAX
21. ASP stands for …….
22. CSS stands for…….
23. PHP stands for…….
24. HTTP uses …… as its communication protocol in which Documents are formatted.
25. ……is an example of a uniform naming scheme for locating resources on the web.
    a) URL

b) HTTP
c) HTML
d) XML

26. ……..is Protocols, for access to named resources over the Web.
a) URL
b) HTTP
c) HTML
d) XML

27. Which of these is a Hypertext, for easy navigation among resources.
a) URL
b) HTTP
c) HTML
d) XML

28. The www was invented by……..
a) Tim Berners-Lee and Robert Cailliau
b) Tim Berners-Lee and Bill Gate
c) Bill Gate and Robert Cailliau
d) None of the above

29. World Wide Web (WWW) project started in the year…….
a) 1989
b) 1990
c) 1991
d) 1992

30. A …….is a character
String that identifies a name or a resource on the Internet.
a) Uniform Resource Identifier (URI)
b) Uniform Resource Locators (URLs)
c) Uniform Resource Names (URNs).

d) None of the above

31. ……..provides a method or specifications for finding Resources on the Internet (including protocol and Path).

a) Uniform Resource Identifier (URI)
b) Uniform Resource Locators (URLs)
c) Uniform Resource Names (URNs).
d) None of the above

32. …….define a method for referencing an object Without declaring the full path to the object.

a) Uniform Resource Identifier (URI)
b) Uniform Resource Locators (URLs)
c) Uniform Resource Names (URNs).
d) None of the above

33. Web resources can be located by using unique

a) Uniform Resource Identifier (URI)
b) Uniform Resource Locators (URLs)
c) Uniform Resource Names (URNs).
d) IP addresses

34. In the domain within the URL http://www.Pastech.com identify the following

a. Top-Level Domain……..
b. Protocol or scheme name……
c. Domain Name…….
d. Subdomain name……

CHAPTER TWO

35. ……..is a software application for Retrieving, presenting, and traversing information resources on the web.

36. List any four (4) major web browsers.
37. Arrange the following in order of reference architecture for web browsers: Browser engine, User interface, Xml parser, rendering engine
38. Which of the following lies between the user and the browser engine and includes the address bar, back/forward buttons, bookmarking menu etc.

a) Browser engine
b) Xml parser
c) User interface
d) Rendering engine

39. …….is responsible for loading a given URI and support browsing actions such as forward, back, refresh/reload which makes querying and manipulation of rendering engine settings possible.
    a) Browser engine
    b) Xml parser
    c) User interface
    d) Rendering engine

40. Which of these is responsible for the visual representation of URI inputs and displaying HTML and XML documents, including embedded contents which is responsible for positioning of page elements within the page and sets up the page layout.
    a) Browser engine
    b) Xml parser
    c) User interface
    d) Rendering engine
41. Rendering engine includes HTML parser. True/False
42. MIME stands for…….
43. Which of the following subsystem is where file transfer protocols FTP and HTTP are enforced which resolves MIME types of files.
    a) Browser engine
    b) Networking
    c) User interface

d) Rendering engine

44. Which of these is one of the most reusable subsystem

a) Browser engine
b) Networking
c) XML parser
d) Rendering engine

45. …… offers drawing and windowing primitives, a set of user interface widgets, and a set of fonts which may be tied closely to the OS.

a) Browser engine
b) XML parser
c) Rendering engine
d) Display Backend

46. …….. subsystem stores various data associated with the browsing session on disk which may be high-level data such as bookmarks or toolbar settings, or it may be low-level data such as cookies, security certificates, or cache.

a) Data persistence
b) XML parser
c) Rendering engine
d) Display Backend

48. ……refer to either the hardware or the software that helps to deliver web contents that can be accessed through the Internet.

a) Data persistence
b) Web server
c) Web browser
d) Web app

49. The most common use of web servers is to……..

50. The primary function of web server is to deliver web pages on the request to clients using the ……..
    a) URL
    b) HTTP
    c) HTML
    d) XML
51. All the following are major web servers except…….
    a) Apache
    b) IIS
    c) Apache Tomcat
    d) PHP
52. All the following are web designing process except…….
    a) Planning the site Structure
    b) Visual Design
    c) Launching
    d) None of the above
53. List all the web designing process in order
54. Which one of these includes a project brief and a project plan.

a) Project Definition
b) Planning the Site Structure
c) Visual Design
d) Site Development

55. Which of the following includes a site diagram and wireframes deliverables

a) Project Definition
b) Site Structure
c) Visual Design
d) Site Development

56. …… is a non-graphical layout of a web wireframe

a) Wireframes

b) Site diagram

c) Visual Design

d) Site Development

57. Which one of these includes a draft of homepage, client feedback and designs and approval of final design

e) Project Definition

f) Planning the Site Structure

g) Visual Design

h) Site Development

58. What does W3C stands for……..

59. All the following are part of Site Development phase except

a) Build and Integrate the Site

b) Build templates and create pages

c) Technical/Functional Plan

d) All the above

60. All the following are part of launching of site except

a) Register a domain

b) Find a hosting company

c) Upload the website

d) All the above

61. Wireframes does not include the containers for all the major elements of the page. True/False

CHAPTER 3

62. The purpose of the World Wide Web project was ……

63. The appropriate ……..instructions indicating how the browser should structure or present the document.

a) Hypertext
b) Markup
c) Server
d) Document

63. Which of the following are Objects (texts or images) that are links to other texts, images or pages.

a) Hypertext
b) Markup
c) Hyperlink
d) Document

64. …….. are HTML codes that are enclosed In angle brackets (< and >).

a) Hypertext
b) Markup
c) Hyperlink
d) Tags

65. The individual markup components are called…….

a) elements
b) Markup
c) Hyperlink
d) Tags

66. In HTML, keywords provided in angle brackets……

a) elements
b) Markup
c) Hyperlink
d) Tags

67. Elements should have
    a) A starting tag and an ending tag
    b) only starting tag
    c) only ending tag
    d) no tag
68. the way a document is marked up with elements and their attributes

    a) Document Type Definition (DTD).
    b) Hypertext Type Definition (HTD).
    c) Cascading Style Sheet (CSS)
    d) None of the above
69. The authoritative source for information about

HTML and the HTML DTD is

    a) the World Wide Web Consortium(W3C)
    b) the World Wide Web
    c) the web
    d) the internet
70. The ……..tags surround the entire HTML document.
    a) <html> </html>
    b) <META> </META>
    c) <SCRIPT> </SCRIPT>
    d) <STYLE> </STYLE>

71. Colors are set using
    a) “RBG”
    b) “RGB”
    c) “RBR”
    d) “BGR”
72. Color codes are represented as…….
    a) hexadecimal values

b) octal values
c) binary values
d) none of the above

73. which of these colors represents blue
a) #FF0000
b) #00FF00
c) #0000FF
d) #000000

74. which of these colors represents red

a) #FF0000
b) #00FF00
c) #0000FF
d) #000000

75. which of these colors represents green

a) #FF0000
b) #00FF00
c) #0000FF
d) #000000

76. which of these colors represents black

a) #FF0000
b) #00FF00
c) #0000FF
d) #000000

77. which of these colors represents black

a) #FF0000
b) #00FF00
c) #FFFFFF

d) #000000

78. The <title> </title> tags are used within the

a) Body tag

b) Head tag

c) Header tag

d) All the above

79. Identify the following in the HTML element structure : <h3 class="student">Passtech IT Services</h3>

a) The element

b) Start tag

c) End tag

d) Content

e) Attribute

80. ……..is a command that tells the browser to perform a task on a web page.

a) element

b) Markup

c) container

d) Empty tags

CHAPTER 4

81. Which of the following has the smallest heading tag

a) <H1>

b) <H6>

c) <H7>

d) None of the above

82. Ordered lists are enclosed in the <ol> </ol> tags. True/False

83. Unordered list is also known as ……

84. Unordered type attribute can be set to all the following except…….

    a) Disc
    b) Square
    c) Rectangle
    d) Circle

85. Which of the following tag performs preformatted text

    a)
    b) <pre>
    c)
    d) <pm>

86. Which of the following tag is for paragraphing text

    e)
    f) <pre>
    g)
    h) <pm>

87. Html supports all the following list accept

    a) Ordered
    b) Unordered
    c) definition
    d) Description

88. It is possible to nest one type of list within another in HTML documents. True/False

89. …….. list is a list in which the list items are numbered sequentially. **a)** Ordered

b) Unordered

c) definition

d) Description

90. Unordered lists are enclosed in the ……..tags.

    a) <ul> </ul>
    b) <ol> </ol>

c)

d) <li> </li>

91. Ordered lists are enclosed in the ……..tags.

a) <ul> </ul>

b) <ol> </ol>

c)

d) <li> </li>

92. Each list item is placed within the ordered list or unordered list tags using the …….. tags

a) <ul> </ul>

b) <ol> </ol>

c)

d) <li> </li>

93. Choose the correct HTML tag for the largest heading

a) <h6>

b) <heading>

c) <head>

d) <h1>

94. What is the correct HTML tag for inserting a line break?

a)

b) <break />

c) <lb />

d) <b>

95. What is the correct HTML for creating a hyperlink?

a) <a name="">A</a>

b) <a>B</a>

c) <a href="http://www.example.com">example</a>

d) <a url="http://www.example.com">example</a>

96. How can you create an e-mail l
ink?

a) <mail href="a@b">

b) <mail>a@b</mail>

c) <a href="a@b">

d) <a href="mailto:a@b.com">

97. How can you make a list that lists the items with bullets?

a) <ol>

b) <list>

c) <ul>

d) <bullet>

98. Write html code to display the following:

1. Joseph Hill
2. Burning Spear
3. Buju Banton
4. Bob Marley

99. Write html code to display the following:

A. Joseph Hill

B. Burning Spear

C. Buju Banton

D. Bob Marley

100. Write html code to display the following:

I. Joseph Hill

II. Burning Spear

III. Buju Banton IV. Bob Marley

101. List any three *type* attribute of the <ol> tag. ……

……..

……..

102. List any three *type* attribute of the <ul> tag.

……

……..

……..

103. Unordered list is also called…….

104. ……..... is a decorative label assigned to each item in a list

105. ……is used to present a term and its definition formatted like a glossary or a dictionary.

106. Write the tag or structure used for definition list

……

……..

……

107. Which of the following contains no links within the document or to other documents.

a) Dynamic web page
b) Static web page
c) Both of the above
d) None of the above

108. Creating links in HTML documents does not add hyper to hypertext. True/False

109. Hypertext document contains element called links

110. Creating links may perform all the following actions except

a) Moving to another part of the same web page.
b) Opening a web page on a web site somewhere else in the world
c) Opening a web page on a web page on the same web site
d) A & B

111. Which of the following are links to items located within a single web page or document.

a) Inter-system links
b) Intra-system links
c) Inter-page links
d) Intra-page links

112. Which of the following are used to link other pages of the same web site.

a) Inter-system links
b) Intra-system links
c) Inter-page links
d) Intra-page links

113. …… is used to link web pages or document located on other web sites or web servers.

114. Write the general format or syntax for creating links in HTML

……..

115. Which of these defines the path to the resources to the displayed when one clicks on the object to click.

a) Href
b) URL
c) URI
d) <a>

116. Href stands for ……..

117. Which of these defines the part to be displayed in HTML link.

a) Hypertext Reference
b) Object to click
c) Uniform Resource Locator
d) None of the above

118. …….attribute defines the link address.

a) Href
b) URL
c) link
d) <a>

119. ……defines where the linked document will be opened.

a) Href
b) URL
c) link

d) <a>

120. Write an HTML syntax to open linked document in a new browser window.

…….
……..
……..
……..
……..
……..
……..

121. List any four(4) attribute value for a target attribute.

Complete the following with appropriate attribute values.

122. …… opens the linked document in the frame as it was clicked.

123. ……opens the linked document in a new browser window.

124. ……. Opens the linked document in the parent frameset.

125. ……..opens the linked document in a named frame.

126. ……..opens the linked document in the browser window.

127. …… is used to create table of content at the beginning of a large document.

128. Write an anchor syntax

.....

129. Write a link syntax to a named anchor.

…….

130. Write any HTML code to link us to chapter five in a given document.

……..

131. Write any HTML code for intra-page link

…….

132. Write any HTML code for intra-system link

…….

133. Write any HTML code for inter-system link

…….

134. The URL for ……links use named anchors.

a) intra-page
b) intra-system
c) inter-system
d) all the above

135. The URL for ……links is absolute.

a) intra-page
b) intra-system
c) inter-system
d) all the above

136. The URL for ……links is relative.

a) intra-page
b) intra-system
c) inter-system
d) all the above

137. Write an HTML code to link to your email.

……

138. Extra helper program referred……..

Write the full name or description of the following and an example of its file extension

139. GIF…….

140. JPEG……..

141. …….

142. PDF……..

143. TIFF…….

144. BMP……..

145. File extension for ".jpg" is part of the Joint Photographers Experts Group. True/False

146. Write an HTML code to insert an image into a web page

……

……

Write the full name or description of the following and example of its file extension

147. MPEG…….

148. MIDI……..

149. RIFF WAVE……

150. AIFF……..

151. AVI……..

152. Which of the following does .mov belongs

a) Resource Interchange File Format Waveform
b) Quick Time
c) Moving Picture Experts Group
d) Musical Instrument Digital Interface

CHAPTER 5

153. A table is divided into rows with ……

a) <table> </table>
b) <tr> </tr>

c) <td> </td>

d) <row> </row>

154. Td stands for……

155. A data cell can contain all the following accept

a) Forms

b) Images

c) Tables

d) None of the above

156. Each row is divided into data cells using the……..tag pair.

a) <table> </table>

b) <tr> </tr>

c) <td> </td>

d) <row> </row>

167. <th></th> defines a ……..

a) Table horizontal

b) Table head

c) Table header

d) Table height

157. ……Surrounds the actual table data.

a) <table> </table>

b) <tr> </tr>

c) <td> </td>

d) <row> </row>

158. ……are programs that process the data from the form and sends a response to the user via the browser.

a) Servers
b) Scripts
c) Hosts
d) All the above

159. Information submitted by users via HTML forms are processed by servers that host the page by using……..

a) Servers
b) Scripts
c) Hosts
d) All the above

160. The following types are the most commonly used input types except a) text,
b) password,
c) submit
d) none of the above

161. Which of the following is used to define a pushbutton.
a) Reset
b) file
c) Submit
d) Button

162. …… defines a textbox with a browse button.
a) Reset
b) file
c) Submit
d) Button

163. Text is a type value used to define a…….
a) Single text box
b) Double line text
c) Depends on the size of the text
d) All the above

164. Which of these defines a title for a fieldset

a) <fieldset> </fieldset>

b) <name> </name>

c) <legend> </legend>

d) None of the above

165. The ……. tag pair is used with the <option> </option> tag pair to create the list of items.

a) <select> </select>

b) <li> </li>

c) <combo> </combo>

d) None of the above

166. ……is the act of writing little computer programs that can enhance the appearance and functionality of web page.

a) Servers

b) Scripts

c) Hosts

d) All the above

167. Scripts are executed either at the server-side or at the client-side. True/False 168. State the two type of scripting

……..

……..

169. ……..is a web server technology in which a user's request is fulfilled by running a script directly on the web server to generate dynamic web pages.

a) Client-side scripting

b) Server-side scripting

c) Both a & b

d) None of the above

170. The primary advantage of Server-side scripting is …….

a) The ability to highly customize the response based on the user's requirement. b) Access rights data
c) Queries into data stories
d) None of the above

171. List any four(4) server-side scripting languages

…….

…….

……

……

172. ……..is a type of scripting that does all of its processing on the user's own computer.

a) Client-side scripting
b) Server-side scripting
c) Both a & b
d) None of the above

173. ……..is the most popular client-side scripting language.

174. Client-side scripting is used to perform all the following accept……..

a) Creating pop-up windows
b) Mouseover effects
c) Shopping-cart caculations
d) Quering into data stored

175. Scripting is ……programming

a) Lightweight
b) Heavyweight
c) Mediumweight
d) All none of the above

176. ……. are interpreted by the scripting parsers of the browser architecture.

a) Client-side scripting
b) Server-side scripting
c) Both a & b
d) None of the above

177. The action and method attributes of the …….

a) <form> tag
b) <script> tag
c) <html> tag
d) All the above

178. List the three basic programming constructs

……

……

……

179. ……. Is a construct that enables us to execute a set of statements one after the other as they appear in a program.

180. ……is a construct that enables us to create codes that can respond to a variety of conditions.

181. ……..is a construct used to repeat a sequence of instructions in a program

182. Iteration is also referred as ……

183. …….container is used to enclose the actual elements of the scripting language.

a) <fieldset> </fieldset>
b) <script> </script>
c) <select> </select>
d) None of the above

184. All the following are common attributes of <script> tag except

a) Language

b) Type
c) Src
d) None the above

185. The …… attribute is used to specify the URL of an external script into HTML document

186. With example show how <script> container is used to specify a particular script language.

187. …….place a script in the head section, you will ensure that the script is loaded before anyone uses it.

188. …… place a script in the body section and it generates the content of the page.

189. …….. Place an unlimited number of scripts in your document, so you can have scripts in both the body and the head section.

190. With syntax, State examples to support number 187,188 and 189.

191. The external script cannot contain the <script> tag. True/False

CHAPTER 6

192. CSS stands for ……..

193. …….is a grouping of formatting in structions that can control the appearance of many HTML pages at once.

194. The technology behind style sheets is called……

195. Which of the following is not a benefit of css

a) Separate styling rules can be used for different output media

b) All styling is kept in a limited number of style sheets
c) Overall saving in bandwidth is measurable
d) None of the above

196. List the three types of style sheet
197. ……..sheet is ideal when the style is applied to many pages.
198. ……. sheet can be used if one single document has a unique style.
199. ……. can be used if a unique style is to be applied to one single occurrence of an element.
200. ……. is a statement that tells browsers how to render particular elements on an HTML page.
201. A rule set consists of a **……** followed by a **……** block.
202. Each declaration consists of a …….. and a…….
203. Declaration groups are surrounded by …….. li{padding-left: 68px;}

Identify the following using the above syntax

204. Selector
205. Declaration
206. Value
207. Property
208. …… is everything between the curly brackets in css
209. List any five(5) selectors in css
210. Rules or Style Declarations begin with ……..
211. …… is indicated by using the pound # sign preceding the name.
212. Use Id selector for page elements that appear …… time on a web page
213. A ……is a name preceded by a full stop (.).
214. A class can be used ……times

215. …….. Is simply the HTML tag you are styling, but without the angular brackets.

216. ……..matches any element that is nested at any level inside another.

217. ……..and ……. are used to apply styles to elements based on their state or position in the document.

218. ……..is indicated with an asterisk *.

219. Universal selector is applied to every single elements on the web page.

220. By default, the image is repeated so it covers the …….

221. Write css code to insert background image to a page 222. List any four(4) css properties.

223. Background color in CSS can be used by all the following except using…….. a) Color name b) Hex value c) RGB value d) None of the above 224. List all the four(4) links states

225. All the following must be done when setting style for several link states except……..

a) A: hover must come after a: link and a: visited b) A:active must come after a: hover c) A: hover must come after a: active
